Crash Course in Gaming Suellen S. Adams, 2013-11-25 Video games aren't just for kids anymore. This book will describe the why and how to start or expand a video gaming program in the library including some specific examples of how to target adult and female gamer patrons. Gaming supplies more than just visual stimulation and empty entertainment; it can also promote socialization as well as the learning of both traditional and new literacies required to succeed in the modern world. Problem solving, multi-tasking, complex decision making on the fly, and reading the combination of words and graphics are vital skills for the 21st century, all of which are required to play video games. *Crash Course in Gaming* discusses the pros and cons of gaming, the types of games and game systems, circulating collections, and game programs. It explains how a library's video game program can and should do much more than simply draw younger users to the library, providing examples of how everyone from parents to senior citizens can benefit from a patron-oriented computer gaming program. The appendices also include specific games programs, review sources, and sources for further information.

Video Games Around the World Mark J. P. Wolf, 2015-05-01 Thirty-nine essays explore the vast diversity of video game history and culture across all the world's continents. Video games have become a global industry, and their history spans dozens of national industries where foreign imports compete with domestic productions. Legitimate industry contends with piracy and national identity faces the global marketplace. This volume describes video game history and culture across every continent with essays covering areas as disparate and far-flung as Argentina and Thailand, Hungary and Indonesia, Iran and Ireland. Most of the essays are written by natives of the countries they discuss; many of them are game designers and founders of game companies, offering distinctively firsthand perspectives. Some of these national histories appear for the first time in English, and some for the first time in any language. Readers will learn, for example, about the rapid growth of mobile games in Africa, how a meat packing company held the rights to import the Atari VCS 2600 into Mexico, and how the Indonesian MMORPG *Nusantara Online* reflects that country's cultural history and folklore. Every country or region's unique conditions provide the context that shapes its national industry, for example, the long history of computer science in the United Kingdom and Scandinavia, the problems of piracy in China, the PC Bangs of South Korea, or the Dutch industry's emphasis on serious games. As these essays demonstrate, local innovation and diversification thrive alongside productions and corporations with global aspirations. Africa, Arab World, Argentina, Australia, Austria, Brazil, Canada, China, Colombia, Czech Republic, Finland, France, Germany, Hong Kong, Hungary, India, Indonesia, Iran, Ireland, Italy, Japan, Mexico, The Netherlands, New Zealand, Peru, Poland, Portugal, Russia, Scandinavia, Singapore, South Korea, Spain, Switzerland, Thailand, Turkey, United
