Discourse In Late Modernity Rethinking Critical Discourse Analysis Critical Discourse Analysis Eup:

Discourse in Late Modernity Lilie Chouliaraki, Norman Fairclough, 1999 Discourse in Late Modernity sets out to show that critical discourse analysis is strongly positioned to address empirical research and theory building across the social sciences particularly research and theory on the semiotic linguistic aspects of the social world It situates critical discourse analysis as a form of critical social research in relation to diverse theories from the philosophy of science to social theory and from political science to sociology and linguistics First the authors clarify the ontological and epistemological assumptions of critical discourse analysis its view of what the social world consists of and how to study it and in so doing point to the connections between critical discourse analysis and critical social scientific research more generally Secondly they relate critical discourse analysis to social theory by creating a research agenda in contemporary social life on the basis of narratives of late modernity particularly those of Giddens Habermas and Harvey as well as feminist and postmodernist approaches Thirdly they show the relevance of sociological work in the analysis of discursive aspects of social life drawing on the work of Bourdieu and Bernstein to theorise the dialectic of social reproduction and change and on post structuralist post colonial and feminist work to theorise the dialectic of complexity and homogenisation in contemporary societies Finally they discuss the relationship between systemic functional linguistics and critical discourse analysis showing how the analytical strength of each can benefit from the other Sets out a new and distinctive theoretical grounding and research agenda for critical discourse analysis Interdisciplinary in scope Draws on a broad range of theories and approaches

The Israeli-Palestinian Conflict in the British Press Ruth Sanz Sabido, 2019-10-15 *The Israeli-Palestinian Conflict in the British Press* provides an extensive empirical analysis of how the Israeli-Palestinian conflict has been constructed in British national newspapers since 1948. It traces the evolution of representations of the conflict by placing them in a historical context with particular reference to Britain's postcolonial relation to Palestine and by presenting an in-depth analysis of the evolution of press language, including the use of terms such as terrorism and terrorist to classify agents of political violence. It applies an original approach to the study of media coverage using a Postcolonial Critical Discourse Analysis framework, an innovative method that examines selected case studies in relation to theories of postcolonialism and discourse. Using this unique hybrid methodology, Sanz Sabido provides a thorough and precise unpicking of a highly mediated conflict.

The Routledge Handbook of Corpus Translation Studies Defeng Li, John Corbett, 2024-10-28 This Handbook offers a comprehensive grounding in key issues of corpus-informed translation studies while showcasing the diverse range of topics, applications, and developments of corpus linguistics. In recent decades, there has been a proliferation of scholarly activity that applies corpus linguistics in diverse ways to translation studies. TS. The relative ease of availability of corpora and text analysis programs has made corpora an increasingly accessible and useful tool for practising translators and for scholars and students of translation studies. This Handbook first provides an overview of the discipline and presents detailed chapters on specific areas such as the design and analysis of multilingual corpora, corpus analysis of the language of translated texts, the use of corpora to analyse literary translation corpora and critical translation studies, and the application of corpora in specific fields such as bilingual lexicography, machine translation, and cognitive translation studies. Addressing a range of core thematic areas in translation studies, the volume also covers the role corpora play in translator education and in aspects of the study of minority and endangered languages. The authors set the stage for the exploration of the intersection between corpus linguistics and translation studies, anticipating continued growth and refinement in the field. This volume provides an essential orientation for translators and TS scholars, teachers, and students who are interested in learning the applications of corpus linguistics to the practice and study of translation.
