

## **1.0 OPERATION MANUAL SPECIFICATIONS**

### **1.1 Scope**

The Main Contractor shall provide an Operation Manual covering the work of the Civil Contract and all Nominated Sub-contracts. Operation Manual shall also be provided by the various equipment suppliers and Nominated Sub-Contractors for integration into the Main Contractor's manual.

### **1.2 General**

The Operation Manual shall be an essential part of the equipment supplied under this Contract. The supply and delivery of equipment will be regarded as incomplete until the draft Operation Manual is submitted and approved. Draft Operation Manual with the content specified shall be submitted in the format specified by Goulburn Valley Water (GVW). GVW has developed Operation Manual templates for use by the Main Contractor, Nominated Subcontractors and equipment suppliers.

#### **1.2.1 Definitions:**

The term contractor shall be read as meaning the Main Contractor, unless specifically noted otherwise throughout this section of the Specification.

#### **1.2.2 Submission of Draft Copy of Manuals**

1.2.2.1 Within 21 days prior to the commencement of commissioning of the Works the Contractor shall provide to the Superintendent for approval, one (1) digital copy of the draft Operation Manual for all items, or groups of similar items of equipment supplied under the Contract.

Salisbury, 1984 **United States Army Training Manual** U.S. Adjutant-general's office, 1925 **Relational Database Systems** Joachim W. Schmidt, Michael L. Brodie, 2012-12-06 After a long period of research development test and trial relational database management systems are at last being marketed in force The feedback from early installations of these systems is overwhelmingly positive The most frequent comment by users is that productivity has been increased by a significant factor from 5 to 20 times what it was using previous approaches Another comment is that in many cases end users can now handle their own problems by direct use of the system instead of using application programmers as mediators

between them and the system As the reputation of relational systems for ease of use and enhanced productivity has grown there has been a strong temptation for vendors of other approaches to exploit the label relational somewhat indiscriminately In some cases the label is being misapplied to a whole data system in others it is being misapplied to an interface It is therefore worth developing criteria which database management systems DBMSs should have in order to be called relational The Relational Task Group RTG of the American National Standards Institute ANSI undertook such an effort by developing a characterization of RDBMSs and analyzing fourteen DBMSs per this characterization The result of this work is presented in this book The conclusions of the RTG are in agreement with my view that a DBMS should not be called relational unless it satisfies at least the following conditions 1 All information in the database is represented as values in tables **IBM Reference Manual** International Business Machines Corporation,1959 **Moody's Manual of Investments, American and Foreign** ,1914 Individual Instruction Sheets Robert Washington Selvidge,1926 Training Manual United States.
