Architecture in the Age of Artificial Intelligence Neil Leach, 2021-11-18 Artificial intelligence is everywhere from the apps on our phones to the algorithms of search engines Without us noticing the AI revolution has arrived But what does this mean for the world of design The first volume in a two book series Architecture in the Age of Artificial Intelligence introduces AI for designers and considers its positive potential for the future of architecture and design Explaining what AI is and how it works the book examines how different manifestations of AI will impact the discipline and profession of architecture Highlighting current case studies as well as near future applications it shows how AI is already being used as a powerful design tool and how AI driven information systems will soon transform the design of buildings and cities Far sighted provocative and challenging yet rooted in careful research and cautious speculation this book written by architect and theorist Neil Leach is a must read for all architects and designers including students of architecture and all design professionals interested in keeping their

practice at the cutting edge of technology 3D-Printed Body Architecture Neil Leach, Behnaz Farahi, 2018-02-01 Some architects dream of 3D printing houses Some even fantasise about 3D printing entire cities But what is the real potential of 3D printing for architects This issue focuses on another strand of 3D printing practice emerging among architects operating at a much smaller scale that is potentially more significant Several architects have been working with the fashion industry to produce some exquisitely designed 3D printed wearables Other architects have been 3D printing food jewellery and other items at the scale of the human body But what is the significance of this work And how do these 3D printed body scale items relate to the discipline of architecture Are they merely a distraction from the real business of the architect Or do they point towards a new form of proto architecture like furniture espresso makers and pavilions before them that tests out architectural ideas and explores tectonic properties at a smaller scale Or does this work constitute an entirely new arena of design In other words is 3D printing at the human scale to be seen as a new genre of body architecture This issue contains some of the most exciting work in this field today and seeks to chart and analyse its significance Contributors include Paola Antonelli MoMA Francis Bitonti Niccolo Casas Behnaz Farahi Madeline Gannon Eric Goldemberg MONAD Studio Kyle von Hasseln 3D Systems Culinary Lab Rem D Koolhaas Julia Krner Neil Leach Steven Ma Xuberance Neri Oxman MIT Media Lab Ronald Rael and Virginia San Fratello Gilles Retsin Jessica Rosenkrantz Nervous System and Patrik Schumacher Zaha Hadid Architects *Digital Architecture Beyond Computers* Roberto Bottazzi, 2021-01-28 Digital Architecture Beyond Computers explores the deep history of digital architecture tracing design concepts as far back as the Renaissance and connecting them with the latest software used by designers today It develops a critical account of how the tools and techniques of digital design have emerged and allows designers to deepen their understanding of the digital tools they use every day What aesthetic spatial and philosophical concepts converge within the digital tools architects employ What is their history And what kinds of techniques and designs have they given rise to This book explores the answers to these questions showing how digital architecture brings together complex ideas and trajectories which span across several domains and have evolved over many centuries It sets out to unpack these ideas trace their origin and permeation into architecture and re examine their use in contemporary software Chapters are arranged around the histories of nine fragments each a fundamental concept embedded in popular CAD applications database layers and fields parametrics pixel programme randomness scanning topology and voxel maxel with each theme examined through a series of historical and contemporary case studies The book thus connects the digital design process with architectural history and theory allowing designers and theorists alike to develop more analytical and critical tools with which to conceptualise digital design and its software **Parametric Architecture** Allen Yoder, 2015 Digital Wood Design Fabio Bianconi, Marco Filippucci, 2019-02-24 This book explores various digital representation strategies that could change the future of wooden architectures by blending tradition and innovation Composed of 61 chapters written by 153 authors hailing from 5 continents 24 countries and 69 research centers it

addresses advanced digital modeling with a particular focus on solutions involving generative models and dynamic value inherent to the relation between knowing how to draw and how to build Thanks to the potential of computing areas like parametric design and digital manufacturing are opening exciting new avenues for the future of construction The book s chapters are divided into five sections that connect digital wood design to integrated approaches and generative design to model synthesis and morphological comprehension to lessons learned from nature and material explorations to constructive wisdom and implementation related challenges and to parametric transfigurations and morphological optimizations

Parametric Architecture Huei Sheng Yu,2009 Current parametric design generates many possible solutions during modeling and design process but in the final stage only allows users to choose one solution to develop This thesis demonstrates a design strategy for physical parametric design that embeds knowledge from simulation tools and helps parametric design still keep variations after final model This thesis begins with an introduction of theory and practices of current parametric design and clarifies the connections between its methods and physical parametric design Then a few new concepts and prototypes are proposed and physical parametric designs are demonstrated The thesis presents a series of case studies investigating specific parametric design methods Their objectives are studying ways to implement variations from parametric design to physical world and to fix parametric design s constraint problem through the use of physical feedback loop Some cases are related to simulation environment which can be used as a test platform for fabrication or responsive environment design others are different data access such as visualization Together these physical parametric design projects indicate how to solve the bidirectional constraint in design exploration Finally this paper evaluates new possibilities of this design strategy and construction method and discusses how the physical models impact digital parametric models key words parametric design Artificial Intelligence Knowledge Base Evolution system design simulation environment Architecture in Formation Pablo Lorenzo-Eiroa,Aaron Sprecher,2013-10-08 Architecture in Formation is the first digital architecture manual that bridges multiple relationships between theory and practice proposing a vital resource to structure the upcoming second digital revolution Sixteen essays from practitioners historians and theorists look at how information processing informs and is informed by architecture Twenty nine experimental projects propose radical means to inform the new upcoming digital architecture Featuring essays by Pablo Lorenzo Eiroa Aaron Sprecher Georges Teyssot Mario Carpo Patrik Schumacher Bernard Cache Mark Linder David Theodore Evan Douglass Ingeborg Rocker and Christian Lange Antoine Picon Michael Wen Sen Su Chris Perry Alexis Meier Achim Menges and Martin Bressani Interviews with George Legendre Alessandra Ponte Karl Chu CiroNajle and Greg Lynn Projects by Diller Scofidio and Renfro Mark Burry Yehuda Kalay Omar Khan Jason Kelly Johnson Future Cities Lab Alejandro Zaera Polo and Maider Llaguno Munitxa Anna Dyson Bess Krietemeyer Peter Stark Center for Architecture Science and Ecology CASE Philippe Rahm Lydia Kallipoliti and Alexandros Tsamis Neeraj Bhatia Infranet Lab Jenny Sabin Lab Studio Luc Courschene Society for Arts and Technology SAT Eisenman Architects Preston Scott
