Joseph L. Graves, Jr.,2025-11-11 There is a persistent gap in life expectancy between Black people and their white counterparts in the United States It is a direct result of structural racism within American society and has nothing to do with genetic differences In past eras scientific racism sought to shift the blame to the supposed physical inferiority of people of African descent Even today medicine labors under false beliefs derived from nineteenth century racial thinking harming patients who are not of European descent Why Black People Die Sooner is a powerful and rigorous examination of the ways racism shapes health and disease Joseph L Graves Jr demonstrates that the medical profession still fails to grasp basic facts about race tracing how deep rooted falsehoods have perpetuated the disparity between Black and white lifespans He equips readers with the tools to dispel the fallacies and errors of racialized medicine including an understanding of evolutionary biology and human biological variation Graves also debunks common misconceptions about race and health on topics such as high blood pressure sickle cell disease the microbiome infectious diseases and cancer Why Black People Die Sooner closes by offering a sweeping vision for dismantling medical racism from professional training to clinical practice through biomedical research Timely and bracing this book reveals why medicine keeps misunderstanding race and how we can make it change

Goodman,2021-12-07 Winner 2024 W W Howells Prize American Anthropological Association Biological Anthropology Section The science on race is clear Common categories like Black white and Asian do not represent genetic differences among groups But if race is a pernicious fiction according to natural science it is all too significant in the day to day lives of racialized people across the globe Inequities in health wealth and an array of other life outcomes cannot be explained without referring to race but their true source is racism What do we need to know about the pseudoscience of race in order to fight racism and fulfill human potential In this book two distinguished scientists tackle common misconceptions about race human biology and racism Using an accessible question and answer format Joseph L Graves Jr and Alan H Goodman explain the differences between social and biological notions of race Although there are many meaningful human genetic variations they do not map onto socially constructed racial categories Drawing on evidence from both natural and social science Graves and

Goodman dismantle the malignant myth of gene based racial difference They demonstrate that the ideology of racism created races and show why the inequalities ascribed to race are in fact caused by racism Graves and Goodman provide persuasive and timely answers to key questions about race and racism for a moment when people of all backgrounds are striving for social justice Racism Not Race shows readers why antiracist principles are both just and backed by sound science **The SAGE Encyclopedia of Theory in Psychology** Harold L.
