## **Exploring Revolution Essays On Latin American Insurgency And Revolutionary Theory:**

*Exploring Revolution* Timothy P. Wickham-Crowley, 2019-07-26 This series of essays on insurgency and revolution focuses on events in Latin America since 1956 The contributors discuss revolutionary theory the nature of social movements and models of social action Topics raised include terror guerilla regimes mobilizing peasants and the vulnerability of regimes to revolution

Revolutions as Organizational Change Baohui Zhan, 2015-09-01 By comparing peasant revolutions in Hunan and Jiangxi between 1926 and 1934 *Revolutions as Organizational Change* offers a new organizational perspective on peasant revolutions Utilizing newly available historical materials in the People s Republic of China in the reform era it challenges the established view that the great Chinese revolution of the twentieth century was a revolution made by the Chinese Communist Party the CCP The book begins with a puzzle presented by the two peasant revolutions While outside mobilization by the CCP was largely absent in Hunan peasant revolutionary behaviors were spontaneous and radical In Jiangxi however despite intense mobilization by the CCP peasants remained passive and conservative This study seeks to resolve the puzzle by examining the roles of communal cooperative institutions in the making of peasant revolutions Historically peasant communities in many parts of the world were regulated by powerful cooperative institutions to confront environmental challenges This book argues that different communal organizational principles affect peasants perceptions of the legitimacy of their communal orders Agrarian rebellions can be caused by peasants attempts to restructure unjust and illegitimate communal organizational orders while legitimate communal organizational orders can powerfully constrain the mobilization by outside revolutionary agents such as the CCP In this thorough comparative account of the peasant risings in Hunan and Jiangxi and the role of the Communist Party Professor Zhang casts new light on both the risings themselves and what they can tell us about peasant risings in general This work is strong in both theory and detailed historical research Richard Rigby professor China Institute Australian National University Professor Zhang has beautifully crafted a comparative study of divergent peasant revolutions in two Chinese regions during Mao s long revolutionary war He brings to this task a broad and deep knowledge about revolutionary theory and also a razor like analytical sensibility which enables him to examine the pros and cons of existing perspectives Timothy P Wickham Crowley associate professor of sociology Georgetown University

*Iraqi Kurdistan, the PKK and International Relations* Hannes Černý, 2017-07-28 Due to its primacy in explaining issues of war and peace in the international arena the discipline of International Relations IR looms large in analyses of and responses to ethnic conflict in academia politics and popular media in particular with respect to contemporary conflicts in the Middle East Grounded in constitutive theory this book challenges how ethnic ethno nationalist conflict is represented in explanatory IR by deconstructing its most prominent state centric models frameworks and analytical concepts As much a critique of contemporary scholarship on Kurdish ethno nationalism as a detailed analysis of the most prominent Kurdish ethno nationalist actors the book provides the first in depth investigation into the relations between

the PKK and the main Iraqi Kurdish political parties from the 1980s to the present It situates this inquiry within the wider context of the ambiguous political status of the Kurdistan Region of Iraq its relations with Turkey and the role Kurdish parties and insurgencies play in the war against ISIS in Iraq and Syria Appreciating these complex dynamics and how they are portrayed in Western scholarship is essential for understanding current developments in the Iraqi and Syrian theatres of war and for making sense of discussions about a potential independent Kurdish state to emerge in Iraq Iraqi Kurdistan provides a comprehensive and critical discussion of the state centric and essentialising epistemologies ontologies and methodologies of the three main paradigms of explanatory IR as well as their analytical models and frameworks on ethnic identity and conflict in the Middle East and beyond It will therefore be a valuable resource for anyone studying ethnicity and nationalism International Relations or Middle East Politics

**Rebellious Families** Jan Kok,2002 Why do people rebel This is one of the most important questions historians and social scientists have been grappling with over the years It is a question to which no satisfactory answer has been found despite more than a century of research However in most cases the research has focused on what people do if they rebel but hardly ever why they rebel The essays in this volume offer an alternative perspective based on the question at what point families decided to add collective action to their repertoires of survival strategies In this way this volume opens up a promising new field of historical research the intersection of labour and family history The authors offer fascinating case studies in several countries spanning over four continents during the last two centuries In an extensive introduction the relevant literature on households and collective action is discussed and the volume is rounded off by a conclusion that provides methodological and theoretical suggestions for the further exploration of this new field in social history

*New Directions in Contemporary Sociological Theory* Joseph Berger,Morris Zelditch Jr.,2002-07-31 Written by eminent sociologists this book introduces and assesses some of the most influential recent sociological theories Each chapter explains the theory and describes a related program of empirical research Chapters are authored by the actual founders and or leading exponents of these theoretical programs many chapters contain a description of the inception growth and present status of the theoretical program The book covers a broad range of sociological concerns from the investigation of power and status processes to social movements and revolutions to organizational and institutional structures to world system analysis Accessibly written for a wide sociological audience this book is an invaluable introduction for undergraduates and graduates to sociology s most important theoretical advances

[The Lockwood Analytical Method for Prediction \(LAMP\)](#) Jonathan S. Lockwood,2013-09-12 The Lockwood Analytical Method for Prediction LAMP is a systematic technique

for predicting short term unique behaviors Using primarily qualitative empirical data LAMP allows the analyst to predict the most likely outcomes for specific research questions across a wide range of intelligence problems such as cyber threats in the U S the possibility of an Al Qaeda attack the likelihood of Iran providing nuclear capability to terrorist groups or the future actions of the Mexican drug cartel LAMP offers an innovative and powerful method for organizing all available information based on the perceptions of the national actors using it to make relevant predictions as to which alternate future is most likely to occur at a given moment in time Its transparent structure enables anyone to see how an analyst gets from point A to point B to produce an intelligence estimate LAMP differs from other analytical techniques in that it is based on determining the relative probability of a range of alternate futures rather than attempting to determine the quantitative probability of their occurrence After explaining its theoretical framework the text leads the reader through the process of predictive analysis before providing practical case studies showing how LAMP is applied against real world problems such as the possible responses of Israel the U S and Lebanon to the behavior of Hezbollah or the competing visions of the future of Afghanistan Evaluation of the method is provided with the case studies to show the effectiveness of the LAMP predictions over time The book is complemented by a website with downloadable software for use by students of intelligence in conducting their own predictive analysis It will be an essential tool for the analyst and the student not only for national security issues but also for competitive intelligence
