

ExtraSolar Planets – Student Guide

Background Material

All background materials and applets for this lab can be found at <http://astro.unl.edu/naap/esp/esp.html>. Complete the following sections after reviewing the background pages entitled Introduction, Doppler Shift, Center of Mass, and ExtraSolar Planet Detection.

Question 1: Label the positions on the star's orbit with the letters corresponding to the labeled positions of the radial velocity curve. Remember, the radial velocity is positive when the star is moving away from the earth and negative when the star is moving towards the earth.

Question 2: Label the positions on the planet's orbit with the letters corresponding to the labeled positions of the radial velocity curve. Hint: the radial velocity in the plot is still that of the star, so for each of the planet positions determine where the star would be and in which direction it would be moving.

In Quest of the Stars and Galaxies Theo Koupelis, 2010-01-26 Available with WebAssign Author Theo Koupelis has set the mark for a student friendly accessible introductory astronomy text with *In Quest of the Universe*. He has now developed a new text to accommodate those courses that focus mainly on stars and galaxies. Ideal for the one term course, *In Quest of the Stars and Galaxies* opens with material essential to the introductory course: gravity, light, telescopes, the sun, and then moves on to focus on key material related to stars and galaxies. Incorporating the rich pedagogy and vibrant art program that have made his earlier books a success, Koupelis' *In Quest of the Stars and Galaxies* is the clear choice for students' first exploration of the cosmos.

In Quest of the Universe Theo Koupelis, 2012-12 Every new copy of *In Quest of the Universe* Seventh Edition print textbook includes access to the Companion Website. Designed for the nonscience major, *In Quest of the Universe* Seventh Edition provides a comprehensive accessible introduction to astronomy while taking students on an exciting trek through our solar system and beyond. Updated throughout with the latest findings in this fast-paced field, the author unfolds historical and contemporary theories in astronomy to provide a clear account of how the science works. His student-friendly writing style and clear explanations acquaint students with our own solar system before moving on to the stars and distant galaxies. New Comparative Planetology boxes and data tables throughout the text examine the similarities and differences in the geology, evolution, and atmospheres of all the planets in our solar system. This rich pedagogy further engages students and motivates them to think critically and develop basic reasoning skills in their studies. New and Key Features of the Seventh Edition: Updated throughout with the latest discoveries in the field with new and expanded content found in each chapter. Added critical thinking and problem-solving exercises can be found at the end of each chapter. New boxes and data tables throughout examine the similarities and differences in the geology, evolution, and atmospheres of all planets in our solar system. To increase understanding and clarity, sample calculations have been added to mathematical sections. Instructor's materials include PowerPoint Lecture Slides, PowerPoint Image Bank, Test Bank, Instructor's Manual, animations, and more. The companion Web site, Starlinks, is included with every new copy of the text and includes study quizzes, Exploration Web links, animated flashcards, an online glossary, chapter outlines, a calendar of upcoming astronomical events, a guide to the constellations, and a new math review tutor.

In Quest of the Solar System Theo Koupelis, 2010-01-26 [Astronomy](#) Eric Chaisson, 2001 This guide to Astronomy includes coverage of the search for extrasolar planets, a discussion of the accelerating universe, expanded coverage of gamma-ray bursts, and continuing coverage of the Galileo mission to Jupiter. There are Concept Check discussion questions integrated throughout each chapter with answers included in the appendix aimed at aiding self-assessment. These critical thinking questions test conceptual understanding of the material just presented and help place it in a broader context.
