Expressibility Problem Efficient Planning Linguistics:

Expressibility and the Problem of Efficient Text Planning Marie Meteer, 2015-12-17 A central problem of natural language generation is that of expressibility Meteer presents a solution which uses a level of representation called the Text Structure an intermediate between the representation of world and the language *Linguistic Issues in Machine Translation* Frank Van Eynde, 2015-12-17 The key assumption in this text is that machine translation is not merely a mechanical process but in fact requires a high level of linguistic sophistication as the nuances of syntax semantics and intonation cannot always be conveyed by modern technology The increasing dependence on artificial communication by private and corporate users makes this research area an invaluable element when teaching linguistic theory **Handbook of Natural Language**

Processing Robert Dale, Hermann Moisl, Harold Somers, 2000-07-25 This study explores the design and application of natural language text based processing systems based on generative linguistics empirical corpus analysis and artificial neural networks It emphasizes the practical tools to accommodate the selected system Handbook of Discourse Processes Arthur C. Graesser, Morton Ann Gernsbacher, Susan R. Goldman, 2003-04-02 This Handbook is a comprehensive overview of the multidisciplinary field of discourse processes The editors hope to foster a more interdisciplinary approach to discourse processing with this Handbook while simultaneously developing an appreciation within the field for multiple methods of establishing rigorous scientific claims The field of discourse processes is currently fueled by seven dominant approaches discourse psychology corpus analysis computational discourse discourse technologies conversation analysis hybrid qualitative and quantitative approaches and cultural foundations The contributors also discuss future trends in research including corpus analyses the integration of neuroscience with discourse research and the development of more advanced computer technologies for analyzing discourse IJCAI-97 International Joint Conferences on Artificial Intelligence, 1997

Computational Linguistics and Intelligent Text Processing Alexander Gelbukh, 2003-07-31 This book constitutes the refereed proceedings of the Third International Conference on Intelligent Text Processing and Computational Linguistics CICLing 2002 held in Mexico City Mexico in February 2002 The 44 revised papers presented together with four invited papers were carefully reviewed and selected from a total of 67 submissions The papers are organized in topical sections on semantics word sense disambiguation anaphora syntax and parsing part of speech tagging lexicon and corpus text generation morphology speech spelling information extraction and information retrieval summarization text mining and text classification and categorization document processing and demo descriptions **8th Conference of the European**
