Electric Motor Control includes a heavy-duty steel, bench-top workstation, a 3-phase AC induction motor, twelve control component panels, a handheld digital multi-meter, and extensive curriculum covering various motor control topics like electrical safety, component and system troubleshooting, and basic timer control. This system uses industrial-quality components that allow learners to practice with equipment that they will encounter on the job. Some of the major components that learners will work with include a control transformer, reversing contactors, manual motor starter, multi-function timer, and control relays.

Electric Motor Control teaches learners how to troubleshoot motor control circuits under realistic conditions. Circuit faults can be introduced using either the included manual fault insertion or through the optional Fault Troubleshooting System (850-FTS1), which includes Amatrol's FaultPro, the industry's leading electronic-fault insertion software.
