

Figure 1-1 is a schematic diagram of a 115-V AC power supply system. The diagram shows a power source (115V AC) connected to a switch, which then feeds into a complex arrangement of components including a transformer, a rectifier, and a filter. Various symbols are used to represent different parts of the system, such as a motor, a lamp, and a buzzer. Callout boxes with arrows point to specific components, providing their functions. For example, one box points to a switch symbol and states "The switch symbol indicates the device able to interrupt or connect the circuit." Another box points to a transformer symbol and states "The transformer symbol indicates the device able to transform electrical energy into heat energy." The diagram is labeled "Figure 1-1" at the bottom.
