Formalized Probability Theory and Applications Using Theorem Proving Hasan, Osman, Tahar, Sofiène, 2015-03-31

Scientists and engineers often have to deal with systems that exhibit random or unpredictable elements and must effectively evaluate probabilities in each situation. Computer simulations while the traditional tool used to solve such problems are limited in the scale and complexity of the problems they can solve. Formalized Probability Theory and Applications Using Theorem Proving discusses some of the limitations inherent in computer systems when applied to problems of probabilistic analysis and presents a novel solution to these limitations combining higher order logic with computer based theorem proving. Combining practical application with theoretical discussion, this book is an important reference tool for mathematicians, scientists, engineers, and researchers in all STEM fields.

Formal Techniques for Safety-Critical Systems Osman Hasan, Frédéric Mallet, 2020-04-25. This book constitutes the refereed proceedings of the 7th International Workshop on Formal Techniques for Safety Critical Systems FTSCS 2019 held in Shenzhen, China, in November 2019. The papers are focused on the topics of the use of formal methods for analyzing safety critical systems, methods, techniques, and tools to support automated analysis, certification, debugging, etc. of complex safety QoS critical systems, analysis methods that address the limitations of formal methods in industry, usability, scalability, etc. formal analysis support for modeling languages used in industry, code generation from validated models.

FM 2009: Formal Methods Ana Cavalcanti, Dennis Dams, 2009-11-04. The FM 2009 the 16th International Symposium on Formal Methods marked the 10th anniversary of the First World Congress on Formal Methods that was held in 1999 in Toulouse, France. We wished to celebrate this by advertising and organizing FM 2009 as the Second World Congress in the FM series, aiming to once again bring together the formal methods communities from all over the world. The statistics displayed in the table on the next page include the number of countries represented by the Programme Committee members as well as of the authors of submitted and accepted papers. Novel this year was a special track on tools and industrial applications. Submissions of papers on these topics were especially encouraged but not given any special treatment. It was just as hard to get a special track paper accepted as any other paper. What we did promote however was a discussion of how originality, contribution, and soundness should be judged for these papers. The following questions were used by our Programme Committee.
