**Modelling the Criminal Lifestyle** Glenn D. Walters, 2017-11-24 This book offers Walters's latest evolution of criminal lifestyle theory. It introduces the concept of criminal thought content to illustrate how the potential interplay between what offenders think and their thought processes can greatly aid our understanding of both crime and criminals. In this new study on criminal behaviour, Walters calls for criminological theory to be placed within a broader scientific context and provides us with several key models which embrace constructs from numerous important theories including the general theory of crime, social cognitive and social learning theories, general strain theory, psychopathic personality theories of crime and labelling theory. Another unique aspect of this work is that it places lifestyle theory within a larger scientific framework, namely nonlinear dynamical systems theory or chaos. Seven principles from chaos theory are used to explain relationships and processes central to lifestyle theory, and Walters uses this to draw conclusions on what affects criminal decision making and desistance from crime. Highly original and innovative in scope, this book will be useful to practitioners and scholars of criminal justice alike, with chapters focussed on decision making, assessment and intervention.

**Understanding Drug Use and Abuse** Benjamin P. Bowser, Carl O. Word, Toby Seddon, 2014-05-30 Addressing drug use and abuse as a global phenomenon, this text draws on contemporary and international research findings to examine the causes of drug use in different countries and to explore different policy responses to its prevention and treatment. It is an invaluable resource for students, practitioners and anyone concerned with drug use.

LaMond Tullis, LaMond Tullis, United Nations Research Institute for Social Development, 1991-09-30 Focusing on a highly controversial and fiercely debated subject, this survey tracks the social and economic consequences of the production, trafficking and consumption of cocaine, heroin and cannabis. From a growing body

of literature LaMond Tullis has extracted the most salient economic social and political themes currently under discussion in both scholarly publications and in the responsible press The two part volume consisting of a lengthy review of relevant literature and an annotated bibliography helps its users understand the major issues Can and should consumption be curtailed supplies suppressed and traffickers eliminated Can the unintended economic social and political consequences of curtailing suppressing and eliminating somehow be mitigated Should these drugs be legalized Would legalization produce its own array of unintended and largely unacceptable consequences Although tentative answers to these questions abound this excellent resource is testimony to the fact that there is still little agreement on how to deal with these powerful substances and the problems they generate Tullis s compilation presents the best overview of this complex subject to date The first half of this two part reference consists of a survey of the published literature on the production and consumption of the three illicit drugs Chapters are devoted to the global patterns of production and consumption of cocaine heroin and cannabis to the consequences both positive and negative of drug consumption and production and to the policy measures that have been adopted or are under consideration in both consuming and producing countries These chapters will be of interest to those wishing to obtain an overall view of the subject and to specialists seeking a guide to the literature outside their particular area of knowledge The second half of the book contains an annotated bibliography of about 2 000 items covering works published in English plus a few in Spanish as books articles or press reports This section will be invaluable to researchers working on the frontiers of the subject and to general readers who wish to pursue particular topics in greater depth The volume should be at the fingertips of policy makers legislators law enforcement officials judges and social workers as well as students and teachers

**Journal of Police Science and Administration** ,1979 Contemporary Drug Policy Henry Brownstein,2013-02-11 This book focuses on the use of drugs in our lives and how we respond to them Whereas drug policy typically centres on the problems of illicit drugs or licit drugs used in illicit ways or circumstances Contemporary Drug Policy instead considers the wide variety of substances we call drugs as a normal part of our personal and social experience and asks how and when drugs benefit us as well as how and when they are harmful The evidence is clear that at some times in some circumstances and in some places drugs are a problem This book does not ignore these issues but shifts our attention to making policies that also recognize their legitimate and constructive place in society It focuses on asking questions challenging assumptions and developing responses to drugs based on evidence from scientific study as directed by critical criminological theory rather than mainstream theory or unfounded assumptions Different from other books on drug policy this book does not offer answers or solutions Rather it shows how critical criminological theories can lead scientific research in new directions supportive of policies that offer both solutions to problems that are found to be related to drugs and an appreciation for the benefits that drugs can bring to people and society This book will be of interest to those studying or researching drug policy as well as professionals involved in policy making processes *Criminology & Penology Abstracts*
