Chevalier,2002 Despite the interest in measuring price sensitivity of online consumers most academic work on Internet commerce is hindered by a lack of data on quantity In this paper we use publicly available data on the sales ranks of about 20 000 books to derive quantity proxies at the two leading online booksellers Matching this information to prices we can directly estimate the elasticities of demand facing both merchants as well as create a consumer price index for online books The results show significant price sensitivity at both merchants but demand at Barnes and Noble is much more price elastic than is demand at Amazon The data also allow us to estimate the magnitude of retail outlet substitution bias in the CPI due to the rise of Internet sales The estimates suggest that prices online are much more variable than the CPI which understates inflation by more than double in one period and gets the sign wrong in another Management Information Systems David Lee Anderson,2000 This text uses cases to explain Management Information Systems concepts within an industry perspective The cases are direct real and written in the late 90 s Each chapter contains specific sections to thoroughly present and explain the relevant information systems and business concepts Built upon extensive information technology sections this text includes contextual elements such as actual financial information and analysis the importance of data and the impact of technology on the manufacturing marketing and distribution processes An appropriate text for Management Information Systems **The Publishers Weekly** ,1972 **Mass Media in the New Millennium** James K.
