Electromagnetic Fields in Biological Systems James C. Lin, 2016-04-19 Spanning static fields to terahertz waves this volume explores the range of consequences electromagnetic fields have on the human body Topics discussed include essential interactions and field coupling phenomena electric field interactions in cells focusing on ultrashort pulsed high intensity fields dosimetry or coupling of ELF fields into biological systems and the historical developments and recent trends in numerical dosimetry It also discusses mobile communication devices and the dosimetry of RF radiation into the human body exposure and dosimetry associated with MRI and spectroscopy and available data on the interaction of terahertz radiation with biological tissues cells organelles and molecules

**Biological and Health Effects from Exposure to Power-line Frequency Electromagnetic Fields** Hiraku Takebe, 2001 The possible health effects of electro magnetic EMF from high voltage electric power lines have been discussed since the 1970s The concern was triggered by epidemiological studies in the United States and Europe that suggested a slightly increased incidence of leukaemia s and brain tumours occurred among those living and working near high voltage power lines Although studies can indicate an association between factor and effect the studies themselves cannot confirm a cause effect relationship Whether EMF is producing these ill effects must be confirmed by experimental studies

Introduction To Dynamic Spin Chemistry: Magnetic Field Effects On Chemical And Biochemical Reactions Hisaharu Hayashi, 2004-03-08 This book presents a detailed account of one of the most mysterious problems in science whether ordinary magnetic fields can exert an appreciable influence on chemical and biochemical reactions The first aim of the book is to introduce this research through theoretical and dynamic spin chemistry to graduate students and researchers by means of detailed theoretical and experimental descriptions The second aim is to review typical recent investigations which will stimulate new interest and applications in the 21st century Because

dynamic spin chemistry is based on established science it is expected to provide a guide for all situations in which radicals radical pairs and higher spin species occur including the effects of environmental electromagnetic fields on the human body
