Rather than looking at individual studies, the book seeks to capture the full complexity of the language learning and intercultural dynamics of study abroad by exploring a wide range of topics of particular interest to study abroad researchers and practitioners, including the role of individual differences, identity reconstruction, and interculturality; the challenges of assessing learning outcomes; and recent pedagogical interventions designed to enhance and extend language learning and engagement in these contexts. The volume also takes a step back to look at future directions for study abroad research and offers innovative interventions in study abroad programming that emphasise its intercultural elements. This book is an authoritative resource for study abroad scholars and researchers in such fields as intercultural communication, applied linguistics, sociolinguistics, and language education. *Handbook of Research in Second Language Teaching and Learning* Eli Hinkel, 2016-11-18 Volume III of the *Handbook of Research in Second Language Teaching and Learning* like Volumes I and II is a comprehensive state-of-the-art overview of current research into social contexts of second language (L2) foreign language (FL) teaching and learning, language policy, curriculum types of instruction, incremental language skills such as listening, speaking, reading, writing, vocabulary, and grammar, international communication, pragmatics, assessment, and testing. It differs from earlier volumes in its main purpose to provide a more in-depth discussion and detailed focus on the development of the essential language skills required for any type of communication: speaking, listening, reading, vocabulary, grammar, and writing. Volume III preserves continuity with previous volumes in its coverage of all the classical areas of research in L2 FL teaching and learning and applied linguistics but rather than offering a historical review of disciplinary traditions, it explores innovations and new directions of research, acknowledges the enormous complexity of teaching and learning, the essential language abilities, and offers a diversity of perspectives. Chapter authors are all leading authorities in their disciplinary areas. What's new in Volume III? Updates the prominent areas of research, including the sub-disciplines addressed in Volumes I and II, and represents the disciplinary mainstays. Considers and discusses perspectives held by different schools of thought on the what, the how, and the why of teaching foundational language skills, including theories, pedagogical principles, and their implementation in practice. Captures new and ongoing developments and trends in the key areas of L2 FL teaching and learning and innovative research.
