Efficiency Issues In Transitional Economies An Application To Hungary:

Efficiency Issues in Transitional Economies Jenifer Piesse, 2018-09-28 Published in 1999 this text uses a number of approaches to measure the performance of firms in the transition economies of Central Eastern Europe during the early stages of reform There is considerable controversy about the level of productivity in this period as is evident by contradictory evidence quoted in the literature and a high degree of inconsistency in published national statistics Indeed the disagreement extends to the measurement approach and the results for this group of countries Particularly difficult is any analysis at the firm level as data is inconsistent incomplete and based on now out dated accounting systems The information used in this book is a panel data set of 64 items collected from 1000 firms across 25 industry sectors in Hungary Productive efficiency is measured and the reasons for poor performance are discussed It was found that industrial sectors differ in their average performance levels and in the factors most likely to account for this Finally recommendations are developed to help to reverse the decline in productivity **FØI Working Paper** ,2006 **Journal of Economic Literature** ,1999 **Public Policy in Transition Economies** Maciej J. Grodzicki, Anna Zachorowska-Mazurkiewicz, 2024-06-21 Public policies are usually carefully designed to address a particular problem but they are also shaped and influenced by the sociocultural heritage of a particular country This volume explores the origins of economic and other public policies in Central and Eastern Europe This region makes for a particularly interesting case because after going through a major system change transitioning from a command economy into a market economy many of the key policies were written anew The contributors to this book look at key policy areas at the intersection of state and private sectors including industrial pension energy and competition policies The chapters examine key questions such as how did these policies evolve from the time of transition to their final form What were the main drivers of policy conduct and factors influencing major policy choices How does the historical context impact contemporary policy space Throughout the volume an institutional approach is adopted according to which policies are perceived as the outcome of top down design filtered through social institutions inherited from the past With this approach this book presents a long running assessment over 30 years of policymaking in transition economies which were subject to profound changes throughout the period This book will be of interest to readers in institutional economics policy studies transition economies and the recent history of Eastern Europe Transition in Survival: Enterprise Restructuring in Twenty East German and Hungarian Companies 1990-1997 Enese Lieb-Doczy, 2019-07-16 This title was first published in 2001 This work features different companies and their change in situation between 1990 and 1997 The author focused on changes in each company s vertical integration its integration with and relationship to its investor changes in its human resource policies and the general handling of labour shedding changes in its product range production methods product markets and competitive situation and the regional effects of FDI and changes in the company s procurement policies The study comprises mainly of manufacturing companies with a few construction companies included to examine
