Victor W. Chang, Guoping Song, 2020-07-04 Where do we come from Who are we Where are we going These three questions continue to haunt human beings since ancient times and they are questions without any explanations The important conclusions from the human genome test of the DNA coding sequence The autosomes are not different between men and women These conclusions irreversibly refute the traditional theory of evolution

We have raised this simple question to seven M D Ph D including three professors who specialize in biology Why are autosomes not different between men and women Invariably their answer was either I cannot explain or I don t know To me as a computer engineer the human genome is equivalent to a software package If we are certain that the 2 9 billion codes of autosomes are not different between men and women then the autosomes must be from the same source sequence of coding I am sure that such a huge coding sequence must have a maker He made the human genome Now we can reach another conclusion the first woman came from the first man by the fact that the 2 9 billion codes of autosomes are not different between men and women The next conclusion is that the first man never came from a woman and he must have neither physical parents nor a regular physiological birth This is a key to open the origins of mankind DNA reveals to us the truth that God created life Suing the United States National Academy of Sciences Victor W Chang, Guoping Song, 2020-06-30 This book will emphatically argue that human beings and chimpanzees have never shared a common ancestor nor did humans undergo evolution or microevolution Moreover this book will discuss the serious mistakes and misleading guidance the book published by NAS National Academy of Sciences Science Evolution and Creationism makes Their argument that human beings and chimpanzees share a common ancestor is wrong without any scientific basis They also claim that the Theory of Evolution is the cornerstone of modern sciences However the facts shown by DNA codes proved that the Theory of Evolution is wrong Based on a wrong viewpoint as the cornerstone NAS suppresses and impedes the development of science NAS members are leaders in American sciences Therefore they have to bear the necessary responsibility Modern science has determined that hereditary information of all living species is totally defined by its own DNA coding sequences Unique DNA codes define a unique species The overall DNA coding sequences keep high fidelity during the genetic breeding of various species thereby helping scientists find sources of any species Since biological features of all species depend on their own DNA codes DNA codes must be the only correct direction and method for understanding Information Resources in Toxicology, Volume 1: Background, Resources, and Tools, 2020-05-16 This the origin of species new fifth edition of Information Resources in Toxicology offers a consolidated entry portal for the study research and practice of toxicology Both volumes represents a unique wide ranging curated international annotated bibliography and directory of major resources in toxicology and allied fields such as environmental and occupational health chemical safety and risk assessment The editors and authors are among the leaders of the profession sharing their cumulative wisdom in toxicology s subdisciplines This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools Due to the increasing size of the hardcopy publication the current edition has been divided into two volumes to make it easier to handle and consult Volume 1 Background Resources and Tools arranged in 5 parts begins with chapters on the science of toxicology its history and informatics framework in Part 1 Part 2 continues with chapters organized by more specific subject such as cancer clinical toxicology genetic toxicology etc The categorization of chapters by resource format

for example journals and newsletters technical reports organizations constitutes Part 3 Part 4 further considers toxicology s presence via the Internet databases and software tools Among the miscellaneous topics in the concluding Part 5 are laws and regulations professional education grants and funding and patents Volume 2 The Global Arena offers contributed chapters focusing on the toxicology contributions of over 40 countries followed by a glossary of toxicological terms and an appendix of popular quotations related to the field The book offered in both print and electronic formats is carefully structured indexed and cross referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed Among the many timely topics receiving increased emphasis are disaster preparedness nanotechnology omics risk assessment societal implications such as ethics and the precautionary principle climate change and children's environmental health Introductory chapters provide a backdrop to the science of toxicology its history the origin and status of toxicoinformatics and starting points for identifying resources Offers an extensive array of chapters organized by subject each highlighting resources such as journals databases organizations and review articles Includes chapters with an emphasis on format such as government reports general interest publications blogs and audiovisuals Explores recent internet trends web based databases and software tools in a section on the online environment Concludes with a miscellary of special topics such as laws and regulations chemical hazard communication resources careers and professional education K 12 resources funding poison control centers and patents Paired with Volume Two which focuses on global resources this set offers the most comprehensive compendium of print digital and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field **Information Resources** in Toxicology P.J. Bert Hakkinen, Asish Mohapatra, Steven G. G. Gilbert, 2009-08-19 This latest version of Information Resources in Toxicology IRT continues a tradition established in 1982 with the publication of the first edition in presenting an extensive itemization review and commentary on the information infrastructure of the field This book is a unique wide ranging international annotated bibliography and compendium of major resources in toxicology and allied fields such as environmental and occupational health chemical safety and risk assessment Thoroughly updated the current edition analyzes technological changes and is rife with online tools and links to Web sites IRT IV is highly structured providing easy access to its information Among the hot topics covered are Disaster Preparedness and Management Nanotechnology Omics the Precautionary Principle Risk Assessment and Biological Chemical and Radioactive Terrorism and Warfare are among the designated International in scope with contributions from over 30 countries Numerous key references and relevant Web links Concise narratives about toxicologic sub disciplines Valuable appendices such as the IUPAC Glossary of Terms in Toxicology Authored by experts in their respective sub disciplines within toxicology Math and Bio 2010 Lynn Arthur Steen, 2005 Math and bio 2010 grew out of Meeting the Challenges Education across the Biological Mathematical and Computer Sciences a joint project of the Mathematical Association of America MAA the National Science Foundation Division of
