Mitsubishi air conditioning units alert owners to errors using LEDs: the indoor circuit board (ICB) has a green LED (GLEID) and a red LED (RLEID), and the outdoor circuit board (OCB) has the same. We are going to look at common faults and how the LEDs in the system can alert you to an error.

Unless stated, these error codes and signals apply to all R410A air conditioning units.

*Essentials of Error-Control Coding Techniques* Hideki Imai, 2014-06-28 *Essentials of Error Control Coding Techniques* presents error control coding techniques with an emphasis on the most recent applications. It is written for engineers who use or build error control coding equipment. Many examples of practical applications are provided enabling the reader to obtain valuable expertise for the development of a wide range of error control coding systems. Necessary background knowledge of coding theory, the theory of error correcting codes, is also included so that the reader is able to assimilate the concepts and the techniques. The book is divided into two parts. The first provides the reader with the fundamental knowledge of the coding theory that is necessary to understand the material in the latter part. Topics covered include the principles of error detection and correction, block codes and convolutional codes. The second part is devoted to the practical applications of error control coding in various fields. It explains how to design cost effective error control coding systems. Many examples of actual error control coding systems are described and evaluated. This book is particularly suited for the engineer striving to master the practical applications of error control coding.
