Management 1 Jan vom Brocke, Michael Rosemann, 2010-09-21 Business Process Management BPM has become one of the most widely used approaches for the design of modern organizational and information systems The conscious treatment of business processes as significant corporate assets has facilitated substantial improvements in organizational performance but is also used to ensure the conformance of corporate activities This Handbook presents in two volumes the contemporary body of knowledge as articulated by the world's leading BPM thought leaders This first volume focuses on arriving at a sound definition of Business Process Management approaches and examines BPM methods and process aware information systems As such it provides guidance for the integration of BPM into corporate methodologies and information systems Each chapter has been contributed by leading international experts Selected case studies complement these views and lead to a summary of BPM expertise that is unique in its coverage of the most critical success factors of BPM **Current Implementation**

Level of Business Process Management in Corporate Practice Michel Hecking, Christian Schröder, 2013-05-06 Seminar paper from the year 2013 in the subject Computer Science Commercial Information Technology grade 1.7 University of Göttingen Chair of Information Management course Crucial Topics in Information Management language English abstract Die Diskrepanzen zwischen Forschung und Praxis sind oft groß Das Thema Geschäftsprozessmanagement GPM wird in der akademischen Forschung viel diskutiert Doch wie sieht die Umsetzung in der Praxis aus Welche Ziele verfolgen die Unternehmen mit dem Einsatz von GPM Welche Software wird zur Unterstützung eingesetzt Können spezielle Anwendergruppen identifiziert werden Um diese Fragen zu beantworten wurde im Rahmen dieser Studie eine Befragung bei über 1100 Unternehmen durchgeführt Der Aufbau und die Ergebnisse werden auf 40 Seiten detailliert vorgestellt *The Complete Guide to Business Process Management* Jean-Noël Gillot, 2008 *Official Gazette Philippines*, 2012 **Business Process Management** Mathias Weske, 2012-05-03 Business process management is usually treated from two different perspectives business administration and computer science While business administration professionals tend to consider information technology as a subordinate aspect in business process management for experts to handle by contrast computer science professionals often consider business goals and organizational regulations as terms that do not deserve much thought but require the appropriate level of abstraction Matthias Weske argues that all communities involved need to have a common understanding of the different aspects of business process management To this end he details the complete business process lifecycle from the modeling phase to process enactment and improvement taking into account all different stakeholders involved After starting with a presentation of general foundations and abstraction models he explains concepts like process orchestrations and choreographies as well as process properties and data dependencies Finally he presents both traditional and advanced business process management architectures covering for example workflow management systems

service oriented architectures and data driven approaches In addition he shows how standards like WfMC SOAP WSDL and BPEL fit into the picture This textbook is ideally suited for classes on business process management information systems architecture and workflow management This 2nd edition contains major updates on BPMN Version 2 process orchestration and process choreographies and the chapter on BPM methodologies has been completely rewritten The accompanying website www.bpm-book.com contains further information and additional teaching material
