truth seen in its order and His grace seen in its providence and resilience make Creation a suitable home for us      *Green Teaching* Claire Warden, 2022-04-29 Just being outside doesn't always guarantee a connection to the natural world. An awareness of the environment needs to be embedded within the curriculum and with climate change and sustainability being such important and urgent issues, this book is a timely and much needed resource for early years and primary educators. Introducing nature pedagogy, an approach that seeks to respect and support the rights of children and the planet together. Nature pedagogy encourages all educators to embrace ecological choices and to use nature as the location, resource and context for learning. The author draws on international research and case studies to offer a way forward to embed green teaching and a nature based pedagogy in practice and transform teaching with young children      *Food and Sustainability* Paul Behrens, Thijs Bosker, David Ehrhardt, 2020 How can we provide sufficient and sustainable food for all? And how might we do this in the context of economic growth, population increases and climate change around the world? As with many other complex global challenges, the transition towards sustainable food defies easy solutions. *Food and Sustainability* presents you with state of the art knowledge of the main dimensions of food sustainability and uses case studies throughout to help you see how to apply the principles and theories set out in each chapter to real world problems. In addition, Food controversy panels highlight how very often there is no single right answer to the problems being faced and different viewpoints need to be weighed alongside one another to find workable solutions. Book jacket      *Globalization, Agriculture and Food in the Caribbean* Clinton L. Beckford, Kevon Rhiney, 2016-04-21 The last decade has seen a growing body of research about globalization and climate change in the Caribbean. This collection is a significant addition to the literature on a topic that is of critical importance to the region. It explores research from a number of Caribbean islands dealing with a range of issues related to agriculture and food in the context of globalization and climate change. Using a broad livelihoods perspective, the impacts on rural livelihoods are explored as well as issues related to community level resilience, adaptability and adaptations. The volume is strengthened by gendered analyses of issues and discussions informed by a diverse range of research methods and methodologies. Scholars of Caribbean studies and studies pertaining to social, cultural, economic and environmental issues facing Small Island Developing States (SIDS) will greatly benefit from this book      *Digital New Deal* Riccardo Genghini, 2021-11-15 *Digital New Deal* analyses the origins of law and its relationship to language and economics and identifies 12 symptoms that point to an authoritarian involution of our democracies. It refuses to indulge in pro forma techno optimism. Neither does it pessimistically predict inescapable doom. A bright future is still possible if we correctly understand the digital equivalents of categories such as identity, persona, home, document, signature, freedom and the close relationship between our fundamental rights and their digital equivalents. Riccardo Genghini's research on a natural law for a digital society has been influenced in particular by Galgano, Popper, Sebeok, Rawls, Ong, Irti, Searle and Ferraris. As professor at the Università Cattolica del Sacro Cuore in Milano, his lessons 2007-2017 on commercial law focussed on comparing the law
