Israel, Professor of Modern European History Jonathan I Israel, 2006-10-12 This is a managerial survey and reinterpretation of the Enlightenment The text offers an assessment of the nature and development of the important currents in philosophical thinking arguing that supposed national enlightenments are of less significance than the rift between conservative and radical thought *Enlightenment Contested* Jonathan I. Israel, 2013 **Adam Boreel**

**(1602-1665): A Collegiant's Attempt to Reform Christianity** Francesco Quatrini, 2020-11-09 In Adam Boreel 1602 1665 A Collegiant's Attempt to Reform Christianity Francesco Quatrini offers a reassessment of the life and thought of Adam Boreel a leading member of the Dutch nonconformist Collegiant movement Usually regarded as a less important member of this religious group Boreel is described as a forerunner whose ideas influenced later Collegiants Drawing on both archival and published sources Francesco Quatrini provides the first modern biography of Boreel as well as a critical analysis of his writings He corrects misconceptions about Boreel who appears here as an intriguing figure who drew his views from several different sources In this way Francesco Quatrini revealed that Boreel was a major leader in the era's intellectual discourse

*Spinoza and Biblical Philology in the Dutch Republic, 1660-1710* Jetze Touber, 2018-06-27 *Spinoza and Biblical Philology in the Dutch Republic 1660 1710* investigates the biblical criticism of Spinoza from the perspective of the Dutch Reformed society in which the philosopher lived and worked It focuses on philological investigation of the Bible its words language and the historical context in which it originated Jetze Touber expertly charts contested issues of biblical philology in mainstream Dutch Calvinism to determine if Spinoza's work on the Bible had bearing on the Reformed understanding of the way society should handle Scripture Spinoza has received considerable attention both in and outside academia His unconventional interpretation of the Old Testament passages has been examined repeatedly during the past decades So has that of fellow radicals rationalists radicals deists libertines and enthusiasts against the backdrop of a society that is assumed to have been hostile overwhelmed static and uniform Touber counteracts this perspective and considers how the Dutch Republic used biblical philology and biblical criticism including that of Spinoza In doing so Touber takes into account the highly neglected area of the Dutch Reformed ministry and theology of the Dutch Golden Age The study concludes that Spinoza rather than simply pushing biblical scholarship in the direction of modernity acted in an indirect way upon ongoing debates shifting trends in those debates but not always in the same direction and not always equally profoundly at all times on all levels

**The Oxford Handbook of Modern French Philosophy**, 2024-06-25 French philosophy is an internationally celebrated national philosophical tradition and this Oxford Handbook offers a comprehensive approach to its history since 1800 The Handbook features essays written by renowned international specialists illuminating key movements and positions themes and thinkers in nineteenth twentieth and even twenty first century French philosophy The volume takes into account developments in recent historical scholarship by broadening the notion of Modern French Philosophy in two ways Whereas

recent approaches in the field have often ignored early nineteenth century developments this volume offers comprehensive treatment of French thought of this period in order to grasp better later developments Moreover the volume extends the canon at the other end of the period of Modern French Philosophy by including work on philosophers who have come to prominence only in the last ten or twenty years The volume takes French philosophy in a broad sense to include all philosophy carried out in France over the last 200 years and it illuminates the institutional and cultural background of this national philosophical tradition in such a way as to provide a fuller and more comprehensive understanding of its unity and of its more famous moments in the twentieth century

**The Architecture of Concepts** Peter de Bolla,2013-12-02 The Architecture of Concepts proposes a radically new way of understanding the history of ideas Taking as its example human rights it develops a distinctive kind of conceptual analysis that enables us to see with precision how the concept of human rights was formed in the eighteenth century The first chapter outlines an innovative account of concepts as cultural entities The second develops an original methodology for recovering the historical formation of the concept of human rights based on data extracted from digital archives This enables us to track the construction of conceptual architectures over time Having established the architecture of the concept of human rights the book then examines two key moments in its historical formation the First Continental Congress in 1775 and the publication of Tom Paine's Rights of Man in 1792 Arguing that we have yet to fully understand or appreciate the consequences of the eighteenth century invention of the concept rights of man the final chapter addresses our problematic contemporary attempts to leverage human rights as the most efficacious way of achieving universal equality

Enlightenment is a universal concept but its meaning is most clearly revealed by seeing how it was engaged with reconfigured or rejected on a local level Peripheries of the Enlightenment seeks to rethink the centre periphery model and to consider the Enlightenment as a more widely spread movement with national regional and local varieties focusing on activity as much as ideas The debate is introduced by two chapters which explore the notion of periphery from vantage points at the very heart of enlightened Europe Ferney and Geneva Through thirteen ensuing chapters the interaction between Enlightenment and periphery is explored in a variety of spatial and temporal contexts ranging from Mexico to Russia Drawing on urban and provincial as well as national case studies contributors argue that we can learn at least as much about the Enlightenment from commentators at the geographical and cultural borders of the enlightened world as from its most radical theorists in its early epicentres Crossing the boundaries between histories of literature religion science and political and economic thought Peripheries of the Enlightenment is not only international in its outlook but also interdisciplinary in its scope and offers readers a new and more global vision of the Enlightenment **The History of Western Philosophy of**
