Changing World Marinus J.A. Werger, Marja A. van Staaldunin, 2012-06-14 Steppes form one of the largest biomes Drastic changes in steppe ecology land use and livelihoods came with the emergence and again with the collapse of communist states Excessive ploughing and vast influx of people into the steppe zone led to a strong decline in nomadic pastoralism in the Soviet Union and China and in severely degraded steppe ecosystems In Mongolia nomadic pastoralism persisted but steppes

degraded because of strongly increased livestock loads After the Soviet collapse steppes regenerated on huge tracts of fallow land Presently new restorative steppe land management schemes are applied On top of all these changes come strong effects of climate change in the northern part of the steppe zone This book gives an up to date overview of changes in ecology climate and use of the entire Eurasian steppe area and their effects on livelihoods of steppe people It integrates knowledge that so far was available only in a spectrum of locally used languages

Polar Icebreakers in a Changing World National Research Council,Transportation Research Board,Marine Board,Division on Earth and Life Studies,Polar Research Board,Committee on the Assessment of U.S. Coast Guard Polar Icebreaker Roles and Future Needs,2007-03-14 The United States has enduring national and strategic interests in the polar regions including citizens living above the Arctic circle and three year round scientific stations in the Antarctic Polar icebreaking ships are needed to access both regions Over the past several decades the U S government has supported a fleet of four icebreakers three multi mission U S Coast Guard ships the POLAR SEA POLAR STAR and HEALY and the National Science Foundation s PALMER which is dedicated solely to scientific research Today the POLAR STAR and the POLAR SEA are at the end of their service lives and a lack of funds and no plans for an extension of the program has put U S icebreaking capability at risk This report concludes that the United States should continue to support its interests in the Arctic and Antarctic for multiple missions including maintaining leadership in polar science The report recommends that the United States immediately program budget design and construct two new polar icebreakers to be operated by the U S Coast Guard The POLAR SEA should remain mission capable and the POLAR STAR should remain available for reactivation until the new polar icebreakers enter service The U S Coast Guard should be provided sufficient operations and maintenance budget to support an increased regular and influential presence in the Arctic with support from other agencies The report also calls for a Presidential Decision Directive to clearly align agency responsibilities and budgetary authorities

Corals in a Changing World Carmenza Duque,Edisson Tello Camacho,2018-03-28 Corals comprise a wide variety of colonial marine invertebrates belonging to the Phylum Cnidaria Their polyps form the most colorful complete and diverse communities on the Earth resembling underwater cities commonly called coral reefs which host a wide variety of invertebrates and fish species They are highly productive ecosystems contribute to the health of the biosphere and offer a good number of economic and ecological services to coastal populations and to many people around the world However due to a diverse number of natural and anthropogenic stressors corals have shown a severe decline over the past few decades Being aware of the importance and relevance of the facts described the book Corals in a Changing World offers new scientific information regarding the actual status and in some cases the resilience state of coral reef systems Timely information is critical for managers and decision makers to implement sustainable management measures according to the ecological condition of coral reefs In addition the book also discusses the use of well maintained coral microcosms to provide a good basis for performing experiments with natural fluctuations and to present studies
