Dynamical Aspects In Fuzzy Decision Making Studies In Fuzziness And Soft Computing:

Dynamical Aspects in Fuzzy Decision Making Yuji Yoshida, 2013-06-05 The concept of fuzziness inspired by Zadeh 1965 brings us fruitful results when it is applied to problems in decision making Recently problems in fuzzy decision making are getting more complex and one of the most complex factors is dynamics in systems Dynamical approach to fuzzy decision making has been proposed by Bellman and Zadeh's celebrated paper Decision making in a fuzzy environment 1970 The idea has developed into fuzzy mathematical programming and has been applied in many fields including management science operations research control theory engineering systems analysis computer science mathematical finance etc Dynamic programming advocated in Bellman's book Dynamic programming 1957 is one of the most powerful tools to deal with dynamics in systems and Bellman and Zadeh has proposed the optimality principle in fuzzy decision making by 1970 introducing fuzzy dynamic programming Fuzzy dynamic programming and fuzzy mathematical programming has been making remarkable progress after they were given life by Bellman and Zadeh's paper 1970 In this volume various kinds of dynamics not only time but also structure of systems are considered This volume contains ten reviewed papers which deal with dynamics in theory and applications and whose topics are potentially related to dynamics and are expected to develop dynamical study in near future first fuzzy dynamic programming is reviewed from a viewpoint of its origin and consider its development in theory and applications Data Mining, Rough Sets and Granular Computing Tsau Young Lin, Yiyu Y. Yao, Lotfi A. Zadeh, 2002-04-10 During the past few years data mining has grown rapidly in visibility and importance within information processing and decision analysis This is particularly true in the realm of e-commerce where data mining is moving from a nice to have to a must have status In a different though related context a new computing methodology called granular computing is emerging as a powerful tool for the conception analysis and design of information intelligent systems In essence data mining deals with summarization of information which is resident in large data sets while granular computing plays a key role in the summarization process by drawing together points objects which are related through similarity proximity or functionality In this perspective granular computing has a position of centrality in data mining Another methodology which has high relevance to data mining and plays a central role in this volume is that of rough set theory Basically rough set theory may be viewed as a branch of granular computing However its applications to data mining have predated that of granular computing **Production Scheduling** Pierre Lopez, François Roubellat, 2013-03-01 The performance of a company depends both on its technological expertise and its managerial and organizational effectiveness Production management is an important part of the process for manufacturing firms The organization of production relies in general on the implementation of a certain number of basic functions among which the scheduling function plays an essential role This title presents recently developed methods for resolving scheduling issues The basic concepts and the methods of production scheduling are introduced and advanced techniques are discussed providing readers with a comprehensive and

accessible guide to employing this process **Belief Functions in Business Decisions** Rajendra P. Srivastava, Theodore J. Mock, 2013-11-11 The book focuses on applications of belief functions to business decisions Section I introduces the intuitive conceptual and historical development of belief functions Three different interpretations the marginally correct approximation the qualitative model and the quantitative model of belief functions are investigated and rough set theory and structured query language SQL are used to express belief function semantics Section II presents applications of belief functions in information systems and auditing Included are discussions on how a belief function framework provides a more efficient and effective audit methodology and also the appropriateness of belief functions to represent uncertainties in audit evidence The third section deals with applications of belief functions to mergers and acquisitions financial analysis of engineering enterprises forecast demand for mobile satellite services modeling financial portfolios and economics

Technologies for Constructing Intelligent Systems 2 Bernadette Bouchon-Meunier, Julio Gutierrez-Rios, Luis Magdalena, Ronald R. Yager, 2013-03-20 Intelligent systems enhance the capacities made available by the internet and other computer based technologies This book is devoted to various aspects of the management of intelligent systems Particular attention is paid to situations in which the available information and data may be imprecise uncertain incomplete or of linguistic nature Various methods developed to manage such information are discussed in the context of several domains of application Topics included in the book include preference modelling and decision making learning clustering and data mining information retrieval The paradigm of computing with words is also addressed Evolving Rule-Based Models Plamen P. Angelov, 2002-02-26 The idea about this book has evolved during the process of its preparation as some of the results have been achieved in parallel with its writing One reason for this is that in this area of research results are very quickly updated Another is possibly that a strong unchallenged theoretical basis in this field still does not fully exist From other hand the rate of innovation competition and demand from different branches of industry from biotech industry to civil and building engineering from market forecasting to civil aviation from robotics to emerging e commerce is increasingly pressing for more customised solutions based on learning consumers behaviour A highly interdisciplinary and rapidly innovating field is forming which focus is the design of intelligent self adapting systems and machines It is on the crossroads of control theory artificial and computational intelligence different engineering disciplines borrowing heavily from the biology and life sciences It is often called intelligent control soft computing or intelligent technology Some other branches have appeared recently like intelligent agents which migrated from robotics to different engineering fields data fusion knowledge extraction etc which are inherently related to this field The core is the attempts to enhance the abilities of the classical control theory in order to have more adequate flexible and adaptive models and control algorithms *Technologies for Constructing Intelligent Systems 1* Bernadette Bouchon-Meunier, Julio Gutierrez-Rios, Luis Magdalena, Ronald R. Yager, 2013-03-20 Intelligent systems enhance the capacities made available by the internet and other computer based

technologies This book deals with the theory behind the solutions to difficult problems in the construction of intelligent systems Particular attention is paid to situations in which the available information and data may be imprecise uncertain incomplete or of linguistic nature Various methodologies for these cases are discussed among which are probabilistic possibilistic fuzzy logical evidential and network based frameworks One purpose of the book is to consider how these methods can be used cooperatively Topics included in the book include fundamental issues in uncertainty the rapidly emerging discipline of information aggregation neural networks bayesian networks and other network methods as well as logic based systems **Mathematical Reviews** ,2004 **Forthcoming Books** Rose Arny,2003 **Joint 9th IFSA World Congress and 20th NAFIPS International Conference** Michael H. classical statistical decision making to its fuzzy counterpart the book presents a dynamic snapshot of the field that is expected to stimulate new directions ideas and developments **Index to IEEE Publications** Institute of Electrical and Electronics Engineers,1989 Issues for 1973 cover the entire IEEE technical literature
