E Power Plant Engineering By Domkundwar:

Fundamentals of Power Plant Engineering R. Yadav, Sanjay, Rajay, 2022-03-31 The purpose of this book is to present a thorough treatment of Fundamental of Power Plant Engineering Conventional and Non Conventional Renewal from working design applications operations control and maintenance point of view This book covers the syllabus of all universities and abroad The book is also highly suitable for all competitive examinations like civil services engineering services and PSUs of central and state governments **A Textbook Of Water Power Engineering** RK Sharma | TK Sharma, 2003 Including Dams Engineering Hydrology and Fluid Power Engineering For the student of B E B Tech Civil Engg Institution of Engineers India U P S C Exam Practising Engineers **International Books in Print** ,1991 **Computational Network Application Tools for Performance Management** Millie Pant, Tarun K. Sharma, Sebastián Basterrech, Chitresh Banerjee, 2019-10-18 This book explores a range of important theoretical and practical issues in the field of computational network application tools while also presenting the latest advances and innovations using intelligent technology approaches The main focus is on detecting and diagnosing complex application performance problems so that an optimal and expected level of system service can be attained and maintained The book discusses challenging issues like enhancing system efficiency performance and assurance management and blends the concept of system modeling and optimization techniques with soft computing neural network and sensor network approaches In addition it presents certain metrics and measurements that can be translated into business value These metrics and measurements can also help to establish an empirical performance baseline for various applications which can be used to identify changes in system performance By presenting various intelligent technologies the book provides readers with compact but insightful information on several broad and rapidly growing areas in the computation network application domain The book s twenty two chapters examine and address current and future research topics in areas like neural networks soft computing nature inspired computing fuzzy logic and evolutionary computation machine learning smart security and wireless networking and cover a wide range of applications from pattern recognition and system modeling to intelligent control problems and biomedical applications The book was written to serve a broad readership including engineers computer scientists management professionals and mathematicians interested in studying tools and techniques for computational intelligence and applications for performance analysis Featuring theoretical concepts and best practices in computational network applications it will also be helpful for researchers graduate and undergraduate students with an interest in the fields of soft computing neural networks machine learning sensor networks smart security etc **Energy Conservation Update** ,1980 **Aeronautical Engineering** ,1979 A selection of annotated references to unclassified reports and journal articles that were introduced into the NASA scientific and technical information system and announced in Scientific and technical aerospace reports STAR and International aerospace abstracts IAA **NASA SP.** ,1979 **Journal of the Institution of Engineers (India).** ,1979 **British Technology Index** ,1979 **Journal of**
