Early Medieval Architecture Oxford History Of Art:

Early Medieval Architecture R. A. Stalley, 1999 Ranging from Gotland to Apulia Roger Stalley explores the richness and variety of European architecture in terms of the social and religious aspirations of the time with an emphasis on the symbolic significance these buildings expressed Written with style and humour the lively text includes many quotations from ancient sources providing fascinating insight into the way that medieval buildings were created and enlivening our knowledge of this period

Medieval Architecture Nicola Coldstream, 2002 Medieval architecture comprises much more than the traditional image of Gothic cathedrals and the castles of chivalry A great variety of buildings synagogues halls and barns testify to the diverse communities and interests in western Europe in the centuries between 1150 and 1550 This book looks at their architecture from an entirely fresh perspective shifting the emphasis away from such areas as France towards the creativity of other regions including central Europe and Spain Treating the subject thematically Coldstream seeks out what all buildings both religious and secular have in common and how they reflect the material and spiritual concerns of the people who built and used them Furthermore the author considers how and why after four centuries of shaping the landscapes and urban patterns of Europe medieval styles were superseded by classicism
