

Important

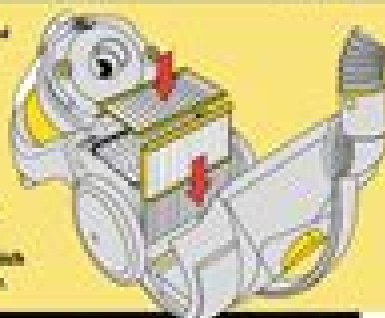

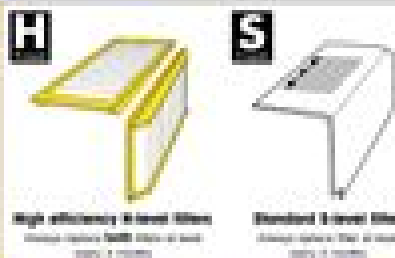

Check both electrostatic filters whenever the bin is emptied and replace at least every 3 months.

Please note that if the filters are not checked regularly and changed as required, the motor may overheat, which will cause the thermal cut-out to operate.

NOTE: Vacuuming builder's dust and some carpet breakers may cause the filters to require changing more frequently. (Dyson does not recommend the use of carpet breakers).

Replacement filters are available from your local retailer or direct from Dyson. Call or fax the Helpline for orders.

IMPORTANT: Use only genuine Dyson filters, which have been tested and approved for this cleaner.

NOTE

Your Dyson has a built-in thermal cut-out to protect it in the event of a restriction in the airflow and may suddenly stop switching temporarily. If you do not change the filter at the stated time, or if it becomes clogged, the filter will stop working.

If the vacuum cleaner suddenly stops working, or the motor makes no sound when switched on, then please check your cleaner for blockages or

directed in the operating manual. Remember also to check the hose in the plug. Having established that there are no blockages and that the filter has been replaced within the stated time, then you should please unplugging for 30 minutes and then try using it again.

If the motor cleaner still does not work, please call Dyson Customer Care (Tel 01466 827272).

IMPORTANT: ALWAYS UNPLUG THE VACUUM CLEANER FROM THE WALL SOCKET BEFORE INSPECTING IT
