A Guide to Compliance for Process Safety Management/Risk Management Planning (PSM/RMP) Frank R. Spellman, 1998-06-03 Establishing, maintaining, and refining a comprehensive Process Safety Management (PSM) and Risk Management Program (RMP) is a daunting task. The regulations are complicated and difficult to understand. The resources available to manage your program are limited. Your plant could be the target of a grueling PSM and RMP compliance audit by OSHA and/or the EPA, which could scrutinize your facility according to their stringent audit guidelines. Ask yourself some questions: Is your municipal plant or industrial facility ready to meet new OSHA and EPA PSM/RMP regulations? Do you understand OSHA's and EPA's requirements? Do you know how OSHA/EPA are interpreting PSM/RMP requirements? Are you prepared for a possible audit? Is your existing PSM/RMP comprehensive, maintainable, and cost-effective? If you answered no to any of these, you need the expert guidance provided by *A Guide to Compliance for Process Safety Management Risk Management Planning*. PSM/RMP. In recent years, chemical accidents that involved the release of toxic substances have claimed the lives of hundreds of employees and thousands of others worldwide. In order to prevent repeat occurrences of catastrophic chemical incidents, OSHA and the USEPA have joined forces to bring about the OSHA Process Safety Management Standard (PSM) and the USEPA Risk Management Program (RMP). Chemical disaster situations can occur due to human error in system operation and/or a malfunction in system equipment. Other emergency situations that must also be considered and planned for include fire, floods, hurricanes, earthquakes, tornadoes,
